

Christmas in Kisii Kenya Revealed! This is what God has been doing in Kenya since January this year

We started the last quarter on 2022 with a goal to raise \$25,000 and we did not succeed in our efforts so we reverted to plan “B”. We were going to add merely an addition to the Pastor’s home, formerly a one room mud brick humble dwelling, and then maybe a secure room for study in the back of the church. This effort would have used all the funds we worked on together of, \$11,000. But Pastor Erick had more faith than I did, and decided to launch out on the dormitory for the children of brick with a potential roof water tank for their first running water via gravity feed.

This is what was developed...Praise God and Hallelujah!

When I saw Pastor Erick’s faith at work I had to support him, so we planned a fund raiser for March and we received enough to get the house this far. We still need to finish the stucco/plaster of the exterior walls and buy some furniture, like beds, and

paint, plus the tank for the roof and the rain gutters to finish the water gathering system. Praise God! Praise God!

Can you help us finish?? I think \$3,500 will complete the building. Please look at the pics of the orphans in one of the new bunk beds (cost \$95 each and need 6 more), and the pic that shows them eating their first meal in the new house.
